

12<sup>th</sup> Meeting of the Advisory Committee

Budapest, Hungary, 7 – 8 May 2007

Synthesis of National Implementation Reports  
and Updates

*The structure of the Synthesis of National Implementation Reports had been revised for the 4<sup>th</sup> Meeting of Parties in September 2003. It was shortened by handling it as a kind of "index" for the National Implementation Reports. The structure with its Annexes remains similar to previous syntheses, but instead of copying all relevant details from the National Reports, tables including a column called "Inf.Nr., page(s)" are shown to make the details in the relevant National Reports easily accessible.*

44 Reports and Updates of Parties and 9 of Non-Party Range States (NPRS) have been included in this Synthesis of National Implementation Reports:

Country <sup>1)</sup>	Period covered	EUROBATS document number (Inf.Nr.) <sup>2)</sup>

- 1) NR = National Implementation Report; U = Update  
National Implementation Reports cover a minimum period of 3 years. Reports that cover less than 3 years are called Updates to National Implementation Reports.
- 2) For simplification, the term "EUROBATS" within the document numbering will not be shown anymore in the following tables of the Annexes B – F.
- 3) France submitted its National Report in French only. Therefore the contents of the National Report could not be incorporated in this Synthesis.

All National Implementation Reports and Updates included in this Synthesis are also available as PDF-files on the EUROBATS website [www.eurobats.org](http://www.eurobats.org).

- Annex A: Status and Trends of European Species
- Annex B: Threats to Bats on a Country-by-Country Basis
- Annex C: Data Collection
- Annex D: Publicity / Public-Awareness Initiatives
- Annex E: International Projects and Co-operation
- Annex F: Measures taken to implement Resolutions adopted by the Meetings of Parties

## **Annex A: Status and trends of European Bat Species**

According to the Format of National Implementation Reports as revised at MoP3, the summary details of resident species as well as status and trends can always be found in the very beginning of each National Implementation Report (topics B.1. and B.2). A compilation of this data is shown in the table below. If more than one National Report / Update of a Party or NPRS was available for this Synthesis, only the most recent data was taken into account.

Sometimes it is difficult to determine if the classification of the status in the National Implementation Reports was done according to the old or to the new IUCN criteria, or according to different national Red Data Book categories. An exact specification is given only in some of the Reports. But it can be assumed that if the abbreviations "Ex, E, CR, V, LR (=> cd, nt, lc), I, DD, K and R" appear, the old IUCN categories were applied, whereas the use of "EX, EW, CR, EN, VU, NT, LC, DD and NE" can be considered as classification according to the new IUCN criteria (2001). To search for more detailed information on the classification, please have a look at the original National Implementation Reports; the relevant document numbers are shown in the table on the front page.

## ABBREVIATIONS:

### Trends:

- o = population stable
- = in decline
- = in drastic decline
- + = population increase
- ? = population trend not clear / no specification

### Status and Distribution:

#### New IUCN categories:

- EX = Extinct
- EW = Extinct in the wild
- CR = Critically Endangered
- EN = Endangered
- VU = Vulnerable
- NT = Near Threatened
- LC = Least Concern
- DD = Data Deficient
- NE = Not evaluated.

#### Old IUCN categories:

- |    |                         |      |                          |
|----|-------------------------|------|--------------------------|
| Ex | = Extinct               | LR   | = Lower risk             |
| E  | = Endangered            | ⇒ cd | = Conservation dependent |
| CR | = Critically endangered | ⇒ nt | = Near threatened        |
| V  | = Vulnerable            | ⇒ lc | = Least concern          |
| R  | = Rare                  | I    | = Indeterminate          |
| DD | = Data deficient        | K    | = Insufficiently known   |

#### Others:

- A = International Responsibility
- ✓ = mentioned and present but no estimation of population size or distribution
- X = mentioned but not / no more appearing / presence not sure

---

<sup>1</sup> Belgium submitted in its National Report 2 separate parts for the Wallonie and the Flemish region. As the classification for the bat species varies in the two different parts of Belgium, in the table above only a ✓ is indicated for the species occurring. For further details and for Belgium's bat populations estimates please see Inf.MoP5.13a, p.1-6 and Inf.MoP5.13b, p.3.

<sup>2</sup> Croatia indicated two more species: *M. alcaethoe*: Rare and *Plecotus kolombatovici*: Common / - ? / **DD**

<sup>3</sup> Czech Republic indicated one more *Myotis* species: *M. alcaethoe*: Rare ? / ? / Not evaluated

<sup>4</sup> Germany mentioned one more *Myotis* species: *M. alcaethoe*: ✓ first observation in Baden-Württemberg (lactating female)

<sup>5</sup> Hungary mentioned one more *Myotis* species: *M. alcaethoe*: ✓

<sup>6</sup> Italy indicated one more *Plecotus* species and one more *Myotis* species: *P. sardus*: ✓ and *M. punicus*: ✓

<sup>7</sup> Bosnia & Herz. indicated one more species: *Plecotus kolombatovici*: ✓

<sup>8</sup> Abbreviations for the categories of the Red Data Book of Russian Federation, 2000:

- I -endangered species ( the threat is very high)
- II -species reducing its population
- III -rare species (stable or slowly increasing population)
- (TBA -to be announced)

### Annotations:

**Roosts:** felling hollow trees, rebuilding and renovation of houses, vandalism, covering entrances, filling caves with ground or rubbish.

**Habitats:** destruction or deterioration of the vegetation structures important for insect hunting, intensification of agriculture and forestry, destruction of natural landscapes, removal of hedgerows and other linear features, construction of roads and motorways.

**Disturbance / tourism:** use of caves for storage, water supply and others, cave tourism, vandalism, mainly disturbance of hibernating bats, transmitters for mobile telephone networks in direct vicinity of the roost.

**Pesticides / chemicals:** use of pesticides in agriculture and forestry, timber treatment chemicals.

**Threats during migration:** loss of habitats and interim roosts along the flyways of migratory species, breaking of these routes by large cultivated land and industrial establishment, downfall during migration.

## Annex C: Data Collection
