## Footnotes:

- 1) population size according to a census in winter / summer 1994
- 2) The species *Myotis ikonnikovi* (X / ?) has been probably mixed up formerly with *Myotis mystacinus*. There has been only one record of *M. ikonnikovi* in 1950.
- 3) specifications for *M. m. mystacinus*. There is another (sub?)species: *M. (m.) aurascens* (35,000-50,000 / widespread / o / "N/A").
- 4) mostly no differentiation between *P. pipistrellus* (45 kHz) and *P. pygmaeus* (55 kHz), exceptions see <sup>5)</sup>
- 5) a differentiation was made in France: *P. pygmaeus*: ?/? / ? / **NT?**  
in Germany: *P. pygmaeus*: ? in at least eight *Länder* / ? / **DD**  
in Hungary: The presence of *P. pygmaeus* was proved in several parts of the country  
in Romania: *P. pygmaeus* was recorded in the Western part of the country and in the Southern Carpathians  
in the United Kingdom: *P. pygmaeus* has been identified at the Isle of Man  
in Armenia: *P. pygmaeus*: numerous / -?  
in Azerbaijan: *P. pygmaeus* was recorded using bat detectors in riparian forests along the Kura Plain  
in Yugoslavia: *P. pygmaeus* was recorded with bat detector in vicinity of Belgrade, Serbia.
- 6) Armenia recorded another *Myotis* species: *M. sevanicus* (*hajastanicus*): numerous / ?
- 7) recorded only once
- 8) occurring from May until September

## ANNOTATIONS:

Where only the national terms for the categories were announced in the national reports, these terms were replaced by comparable IUCN terms / categories.

## ABBREVIATIONS
