

25th Meeting of the Advisory Committee

Videoconference 30 April 2021

Report of the Intersessional Working Group on Evaluation criteria for Assessment Reports concerning Bats

The IWG met online on March 16th to discuss a draft of the criteria list based on the Annex (Table13) of the „Arbeitshilfe zur Berücksichtigung des Fledermausschutzes bei der Genehmigung von Windenergieanlagen (WEA) in Thüringen“, authored by the Institut für Tierökologie und Naturbildung:

https://tlubn.thueringen.de/fileadmin/00_tlubn/Naturschutz/Dokumente/1_zool._artenschutz/5_Artenschutz_und_Windenergie/arbeitshilfe_fledermause_und_windkraft_thuringen_20160121.pdf).

A provisional English version was examined and discussed by all participants of the meeting. It was agreed that the document is adaptable to the scopes of the working group. The members were requested to give their feedback to tailor the document to the specific needs of the IWG. The convenors are awaiting the latest comments, if any, and then will work on the draft and circulate it among the members to finalize the list. In the next AC meeting a resolution will be drafted to adopt the criteria list at the next MOP.
