

25th Meeting of the Advisory Committee

Videoconference 30 April 2021

Report of the Intersessional Working Group on Education

The IWG met online on March 17.

Once again, blaming bats for the current pandemic, highlights the importance of increased education on bat behaviour. After lengthy discussion, the group has decided to make a short educational documentary related to COVID-19 and how bats are being unfairly blamed.

The Group will provide a video script and directions for video recording to the EUROBATS country representatives, and respectfully request them to record and send to us a short video (30-40 seconds). After receiving these videoclips, an educational video will be created and shared.
