

EUROBATS National Implementation Report

In the Resolution 7.4, the 7th Meeting of Parties to EUROBATS decided to adopt a new format for the National Implementation Reports and instructed the Secretariat to make this new format available for online completion in time for MoP8.

Present format of national reports was carefully revised by the relevant Intersessional Working Group during the 20th Meeting of the Advisory Committee (2015) in order to include the Resolutions of MoP7 and is now available on the CMS Family Online Reporting System (ORS).

Please visit the Support Centre page in case of any questions regarding the Online Reporting System. The link is available in the bottom left corner.

A. General Information

Name of your country

> Denmark

Period covered by this report

> 2014 - 2017

Is your country a party to EUROBATS Agreement?

Yes

Competent authority

Title, address, phone, fax, e-mail and other contact details

> Mr. Lasse Jensen

Environmental Planner

Danish Agency for the Environment

Haraldsgade 53

2100 Copenhagen Ø

Denmark

Personal details of administrative focal point (s)

> Administrative focal point Mr. Lasse Jensen

Danish Agency for the Environment

Haraldsgade 53

2100 Copenhagen Ø

E-mail: lajen@mst.dk

Phone: +45 4126 9340

Please give details of designated scientific focal points

> Morten Elmeros,

Department of Bioscience, Aarhus University,

Grenåvej 14, DK-8410 Rønne, Denmark

E-mail: elm@bios.au.dk

Phone: +4520731575

Compilers and contributors to this report

> Morten Elmeros & Lasse S Jensen

B. Status of bat species within the territory

Please assess a national status ONLY for those bat species from the Annex 1 to EUROBATS Agreement that were recorded in your country

Barbastella barbastellus (Schreber, 1774)

Status of the species occurrence

Resident

Overall national trend

C. Measures taken to implement Article III of the Agreement

Does the national legislation protect all bat species?

Yes

Please, give details of the legislation which is protecting bats

> All bats in Denmark have been protected by law since 1931 (Game Act of 1931). Since the Game Act of 1967 and the Hunting and Game Act of 1993, all mammals and birds without an open sea-season are fully protected and may not be hunted or killed. This has been further strengthened by a statutory order no. 901 of 11th July 2007. Furthermore it is forbidden to ring or mark bats without a license.

The habitats of bats are protected by the Nature Act of 2017. This act prohibits altering state of natural lakes of more than 100 m² and of watercourses. Moors, bogs, marshes, swamps, coastal meadows, humid permanent grasslands and uncultivated, dry meadows are covered by the same prohibition when the habitat types cover more than 2,500 m² either separately, jointly or in connection with the before mentioned lakes. In amendment to the Danish Forest Act revision of 1989 it was made statutory that not only for-estry production should be taken into consideration but also nature conservation and protection of environmental values (good and multiple-use forest management). Furthermore provisions for preservation of deciduous forest edges, oak coppices, lakes, streams, marshes, moors, salt meadows and foreshores of the forest reserves were established.

Which species are not protected and why?

> All species are protected.

1. Guidelines for the issue of permits for the capture and study of captured wild bats

Does the system of permits or licenses for the capture of bats exist in your country?

Yes

Comments (optional)

> Generally it is not permitted to capture wild mammals unless the species, purpose and methods are specifically stated in the legislation. Bats are not listed.

Permits to capture bats are only given to research institutes and to consultants for specific monitoring projects. There is no licensing system for the consultants wanting to capture bats

System of permits or licences to keep bats for educational or animal welfare purposes

Doesn't exist

System of permits or licences for sampling, ringing, killing of bats for scientific studies

Exists

2. Identified and protected sites which are important to the conservation of bats

Click "expand" to see the questions!

Resolution 5.7. Guidelines for the protection of overground roosts, with particular reference to roosts in buildings of cultural heritage importance

2.4. List of national important overground roosts (including legal/physical protection status)

Exists

You have attached the following documents to this answer.

[List of national important overground roosts.pdf](#)

Comments

> As a result of the EU Habitats Directive, Danish legislation prohibits damage or destruction of all breeding or resting areas.

2.5. National guidelines for custodians of historical buildings on the protection of bat roosts have been developed

No

Comments

> As a result of the EU Habitats Directive, Danish legislation prohibits damage or destruction of all breeding or resting areas.

Resolution 7.6. Guidelines for the protection and management of important underground habitats for bats

Updated counts of bats at each listed site are submitted to the Secretariat

No

2.1. List of important underground sites

2.1. List of important underground sites for bats and measures of their protection (including Natura 2000, Emerald or other status) was submitted to EUROBATS

Yes

You have attached the following documents to this answer.

[List of important underground sites for bats and measures of their protection \(including Natura 2000 Emerald or other status\) was submitted to EUROBATS.pdf](#)

2.2. Management of important underground sites for bats is in accordance with EUROBATS Publication n°2

No

3.Consideration given to habitats which are important to bats

Click "expand" to see the questions!

Resolution 7.7. Bat conservation and sustainable forest management

National guidance has been developed based on the principles in the EUROBATS Bats and Forestry leaflet

No

Examples of best practice for forest management are submitted to the Secretariat

No

Resolution 7.8. Conservation and management of critical feeding areas, core areas around colonies and commuting routes

Awareness of the importance of critical feeding areas, core areas around known colonies and commuting routes for bats exists

Yes

Measures to take bats into account in land use and planning decisions

Yes

Research and monitoring to improve understanding of the use of landscape by bats are ongoing

No

4. Activities to promote the awareness of the importance of conservation of bats

Click "expand" to see the questions!

4.1. International Bat Night. Give details for each year: number of events and number of people participated

> 0

5. Additional actions undertaken to safeguard populations of bats

Click "expand" to see the questions!

Resolution 5.4. Monitoring bats across Europe

Awareness-raising of the importance of underground sites

No

Resolution 6.6. Guidelines for the prevention, detection and control of lethal fungal infections in bats

5.17. Surveillance for the presence of fungal infections

No

Resolution 7.5. Wind turbines and bat populations

5.2. Raising awareness on the impact of turbines on bats and the existence of some unsuitable habitats or sites for construction

No

5.3. Pre-construction impact assessments, if possible, undertaken by suitably experienced bat experts

Yes

Please, give details

> Environmental impact assessment el. EIA-assessment

5.4. National guidelines were developed following Eurobats Pub. No. 6

No

National guidelines are implemented

No

5.5. Investigations and research for mitigating bat mortality have been undertaken

No

Resolution 7.9. Impact of roads and other traffic infrastructures on bats

5.23. Bats are taken into account during the planning, construction and operation of roads and other infrastructure projects

Yes

5.24 Pre-construction strategic and environmental impacts assessment procedures are mandatory

Are mandatory

5.25. Post-construction monitoring

Isn't required

5.26. Raw data from environmental impact assessment and post-construction monitoring is available for independent scientific analysis

No

5.27. Research into the impact of new and, where appropriate, existing roads and other infrastructure on bats and into the effectiveness of mitigation measures

No

5.28. National guidelines are developed

No

Resolution 7.10. Bat Rescue and Rehabilitation

5.29. Animal rescue and rehabilitation systems are effective in the country

Yes

5.31. Bat rehabilitators contribute their data to a national database

No

Resolution 7.11. Bats and building insulation

5.32. Are there conflicts between insulation regulations and bat conservation?

No

5.34. Impacts on bats are included in the environmental assessment of insulation programs

Yes

Resolution 7.12. Priority species for autecological studies

Rhinolophus blasii Peters, 1866

Some studies have been conducted (are ongoing) for this species in the country

No

Eptesicus isabellinus (Temminck, 1840)

Some studies have been conducted (are ongoing) for this species in the country

No

Myotis escalerae Cabrera, 1904

Some studies have been conducted (are ongoing) for this species in the country

No

Nyctalus azoreum (Thomas, 1901)

Some studies have been conducted (are ongoing) for this species in the country

No

Nyctalus lasiopterus (Schreber, 1780)

Some studies have been conducted (are ongoing) for this species in the country

No

Pipistrellus hanaki Hulva & Benda, 2004

Some studies have been conducted (are ongoing) for this species in the country

No

Pipistrellus maderensis (Dobson, 1878)

Some studies have been conducted (are ongoing) for this species in the country

No

Plecotus kolombatovici Dulic, 1980

Some studies have been conducted (are ongoing) for this species in the country

No

Plecotus sardus Mucedda, Kiefer, Pidinchedda & Veith, 2002

Some studies have been conducted (are ongoing) for this species in the country

No

Plecotus teneriffae Barrett-Hamilton, 1907

Some studies have been conducted (are ongoing) for this species in the country

No

6. Recent and ongoing programmes (including research and policy initiatives) relating to conservation and management of bats

Click "expand" to see the questions!

Resolution 5.2. Bat rabies in Europe

6.5. National bat rabies surveillance network

Yes

Please give details

> DTU-National Veterinary Institute capture 100 - 200 bats yearly and collects saliva samples from these to analysis for rabies.

6.6. Vaccination against rabies is compulsory

No

6.7. Details of the institution(s) in charge of recording of all test results and their submission to the World Health Organisation

> Statens Serum Institut (SSI)

5 Artillerivej

DK 2300 Copenhagen S

serum@ssi.dk

7. Consideration being given to the potential effects of pesticides on bats, and their food sources and efforts to replace timber treatment chemicals which are highly toxic to bats

Click "expand" to see the questions!

Resolution 4.5. Guidelines for the use of remedial timber treatment

7.1. Small projects to provide basic data to allow an assessment of the potential impact of industry on bat populations

No

7.2. Raising awareness of product users is taking place

No

7.3. Legislation on products which have any adverse effects on bats

Exists

Resolution 6.15. Impact on bat populations of the use of antiparasitic drugs for livestock

7.4. Efficient non-chemical methods to control livestock parasites and use of products of least toxicity to non-target species implemented

No

7.5. Research on the use of antiparasitic drugs

No

7.6. Recommendations in Annex I to the Resolution 6.15 are adopted

No
